TRAVEL INDUSTRY PROBLEMS

Inefficient Inventory Approval and Dispute Settlement
Capital intensive and inefficient process. Require a lot of works and manpower.

High Customer Acquisition Cost
Customer acquisition is heavily relied on advertising middlemen.

High Cross-Border Payout
Payment processors take significant margin, and time.

TRIIPMILES SOLUTION

Automate & decentralize high cost operation processes
Qualifying and rating tour guides & accommodation quality will be published to the original P2P protocol, eliminating the intervention of a centralized system.

Align incentives
P2P travel token used by all stakeholders: travellers, locals, hotel owners, reviewers, promoter. Rewarding token for activities on the platform.

Increase income by lowering transaction fees
With TriipMiles, there will be no foreign transaction fee, no currency conversion. Save money for hosts and guests.
